PROJECTS
(more at my GitHub)

RFP Hub *(Ruby on Rails, PostgreSQL, AWS),* Sept' 16 – present
Working on a development team to create a SaaS platform where users can collaboratively generate Request For Proposal documents.
- Implemented user auth via bCrypt and resource management (CRUD).
- Created Rspec testing suite.

Sound Finder (*Angular, Node, Bootstrap)* / GitHub / Heroku
- Single Page Application.
- Search feature lets user find their favorite artist.
- Fetches recommendations based on user search from Spotify API.

Who Would Win? (*Ruby on Rails, PostgreSQL, Bootstrap)* / GitHub / Heroku
- Returns a simulated matchup between two teams based on previous scores. Custom-made discussion board that tracks users post count.
- Error handling rejects improper input.
- Flash notifications show when user modifies resource.

SKILLS

JavaScript, Ruby, Ruby on Rails, C++, HTML5/CSS3, PostgreSQL, Mongo DB, Angular, Express, Mongoose, jQuery, Git, Mocha, Karma, Expect, Rspec.

WORK

Assistant Systems Specialist: Genentech (Redwood City, CA), Aug'15 – Jun'16
- Supported a network of over 20,000 employees. Identified & resolved over 20 hardware and software related issues daily.
- Utilized HPSM ticketing system to document issues and fixes. Frequently contributed fixes to internal database.

Manufacturing Supervisor: Zazzle (San Jose, CA) Oct' 11 – Aug' 15
- Led a team of 60 people to aggressively drive down a 4,000+ order backlog to less than 200 within a 1month "peak" period. All products shipped matched or exceeded SLA's and quality standards.
- Delivered training, scheduling, and guidance to lower-level staff.
- Leveraged several Raster Image Processing (RIP) softwares.
